The global compact for safe orderly and regular migration & the global compact for refugees: *Share your experiences*

The processes to towards two new international agreements, 'global compacts', on refugees and migrants are now well underway. QUNO is working for these to be ambitious, effective and human rights-based international agreements.

As part of the consultation phase anyone is welcome to submit written information relevant to with or both of the global compacts. **We are aware that many Friends are involved in activities on these issues, but we do not have the full breadth and depth so we encourage you to share your experiences of your work with refugees and migrants.**

For both processes it would be particularly useful to hear about one or more of the following:

- A. Practical action you are undertaking (for example language classes, food/clothing distribution, hosting), if possible also comment on the government policies that help or hinder this.
- B. Good practice from government in policy and/or practice (for example firewalls between public services and enforcement).
- C. Problems caused by government policy or practice and the changes in policy and practice that you think are needed.

Where possible include case studies and any relevant statistical information.

Please be aware that submissions will be posted online.
